## ACHIEVEMENTS

Katy Youth Hacks- Girls Who Code  
Hackathon• audience favorite

## projects

Donation drive landing page-  
facilinate  
2021

<https://www.behance.net/gallery/144848891/facilinate-a-better-more-personalized-way-to-donate>

Designed and implemented a website which would ease the process of donating unneeded items during busy college move out weeks, in order to benefit both donation centers and the a speedier, more efficient dorm clean out process.

technologies:  
adobe xd- for the wireframe  
figma prototyping  
html/css

our biomes  
2021

designed a website which includes a quiz-style game in which players test their knowledge about the world's biomes and which highlights organizations championing conservation, using Python Flask.

Flower Power  
2022

designed and implemented an interactive e-commerce landing page for a flower-selling boutique, in the form of a website that allows users to select and purchase many sorts of flowers, from trendy bouquets to roses. with , as well as product categories. The webpage features a shopping cart and search button, as well as product categories, and the ability for the user to "heart" a product they may enjoy.

Food deserts in miami-dade  
2022

Winner of the Audience Favorite category in Katy Youth Hacks (girls who code hackathon)

<https://devpost.com/software/food-deserts-in-miami-dade-an-interactive-website>  
<https://chloeposthumacoelho.github.io/fooddeserts-miami/>

combined elements of design and UX as well as frontend web development to create an interactive website showcasing food desert hotspots in miami-dade.
